SUMMARY

Associate Team Lead with 8+ years building .NET and Azure systems, and leading engineering teams through the move to AI-assisted development. Promoted to lead in April 2026 after architecting HIPAA-compliant healthcare integrations. Currently driving adoption of Claude Code, GitHub Copilot and Codex: authoring the AI-assisted development policy, running a 15-module engineering curriculum, and shipping a .NET 10 + React reference application built with Claude Code. Hands-on with CQRS, Vertical Slice Architecture and microservices.

100K+

patient records synced
across 3 HIPAA portals

30%

lower server costs after
API re-architecture

92%

provider adoption of
Invariant EHR

6

production bugs caught
by AI review agents pre-
release

EXPERTISE

AI engineering	Claude Code, GitHub Copilot, OpenAI Codex, prompt & context engineering, Skills & MCP, AI code-review subagents, AI usage & verification policy
Backend	.NET 10 / .NET Core, C#, ASP.NET Core Web API & Minimal APIs, CQRS & MediatR, Vertical Slice Architecture, EF Core, microservices, REST
Cloud & DevOps	Azure App Service, Static Web Apps, Azure SQL, Azure AI Cognitive Services, Docker, GitHub Actions CI/CD
Frontend	React, TypeScript, Redux, TanStack Router/Query, Tailwind CSS, shadcn/ui
Data & quality	MS SQL Server, T-SQL, FluentValidation, unit testing, automated & AI-assisted code review
Domains	Healthcare (HL7, HIPAA, EHR), e-commerce (SOC2), audit & inspection

EXPERIENCE

Associate Team Lead · Mindfire Solutions

Apr 2026 – Present

- Promoted from Senior Software Engineer to lead a .NET/Azure engineering team.
- Leading team-wide adoption of Claude Code, GitHub Copilot and Codex; authored the AI-Assisted Development Policy covering data classification, verification, PR process, incident response and model selection.
- Designed and deliver a **15-module** AI-assisted engineering curriculum for experienced .NET developers: context engineering, security verification, Skills, MCP and subagents.
- Built TaskFlow end-to-end with Claude Code; review subagents caught **6** production-grade bugs, including a TOCTOU race condition and a regex vulnerability, before release.
- Presented the AI-assisted workflow and TaskFlow demo to **~50** engineers.

Senior Software Engineer · Mindfire Solutions

Jan 2023 – Apr 2026

- Integrated three healthcare portals with the Invariant system under HIPAA, securely synchronising **100,000+** patient records.
- Architected role-based authentication and HL7 data flows for a US client's Electronic Health Record platform.

Senior Software Engineer · QSS Technosoft

Nov 2019 – Jan 2023

- Built a scalable, API-centric infrastructure that cut server costs by 30% and improved application response time by 50%.
- Architected Invariant, an HL7-based Electronic Health Record system, reaching 92% adoption among healthcare providers.

Web Application Developer · Codemites

Aug 2018 – Aug 2019

- Built client web applications with ASP.NET MVC and React.

Web Application Developer · Interface Technologies

Mar 2015 – May 2016

- Built web applications on the ASP.NET MVC framework.

PROJECTS

TaskFlow · AI-built project management platform

Projects, users and tasks with filtering, pagination, dashboard analytics and JWT auth, built end-to-end with Claude Code (CLAUDE.md, custom Skills, review subagents). One GitHub Actions pipeline deploys to Azure App Service, Static Web Apps and Azure SQL.

.NET 10 · Minimal APIs · MediatR · EF Core · FluentValidation · React 18 · TypeScript · TanStack · Tailwind · Azure

Invariant · HL7-based Electronic Health Record system

EHR platform for a US healthcare client with role-based authentication and Azure AI Cognitive Services, Bot and LUIS integration; 92% provider adoption.

ASP.NET Core Web API · React · Azure Cognitive Services · Azure Bot · LUIS

Iris · E-commerce portal for optical products

Integrated an ASP.NET Core Web API into a legacy store, achieving SOC2 compliance and a 15% lift in conversion through an optimised checkout.

.NET 8 · ASP.NET Core Web API · Entity Framework · React · AutoMapper · Azure

Costco Inspection & Factory Assessment · Inspection and audit software

Live-video remote product inspections saving 25+ hours weekly; a self-assessment and third-party audit platform that cut audit time by 30% across 35+ factories.

ASP.NET Core Web API · React
